Research interest in “transformative change” that is vivid, unplanned, positive and permanent.
Religion & Recovery: The Critics

1. Religious conversion as a vehicle of recovery is open only to a small percentage of people with AOD problems.

2. Engagement of addicts in church-based programs diverts them from medical institutions where they could be more effectively treated.
Religion & Recovery: The Critics

3. Religious conversion could actually harm the alcoholic (by replacing alcohol addiction with religious fanaticism).

4. Promoting religion as a method of curing alcoholism secularizes religion by turning it into a product of the marketplace.
Thematic Summary

1. Transformative religious & spiritual experience constitutes a legitimate catalyst of addiction recovery

2. Living in a community of shared experience, strength and hope heightens the quality and stability of addiction recovery.
3. Recovery is something more than the removal of alcohol & drugs from an otherwise unchanged life, e.g., reconstruction of one’s relationship with God, with others and with oneself.

4. Recovery often involves the embrace of core spiritual values, e.g., release, gratitude, humility, tolerance and forgiveness.
5. There is a long tradition of “wounded healers” in the addictions arena—people who use their own healing as a platform to help others.

6. There is a long tradition of integrating religion, psychology and medicine in the treatment of addictive disorders.

7. The historical import of a single life can be enormous.
