T. A. McNicholl M. D., New York City. Prof. Max Kassowitsch, Wrinz, Prussia.

THE QUARTERLY JOURNAL OF INEBRIETY is published in the months of March (Spring),
June (Summer), September (Autumn), and December (Winter) at 50 cents a copy, $2.00 a
year. Subscribers not receiving their copies by the end of these months should immediately
notify the publisher. As it is the wish of most subscribers to receive unbroken volumes
The Journal is sent until ordered discontinued.

RICHARD G. BADGER, PUBLISHER, 194 BOYLSTON STREET, BOSTON, U. S. A.
SYR. HYPOPHOS. CO., FELLOWS

Contains the Essential Elements of the Animal Organization—Potash and Lime.
The Oxidising Agents—Iron and Manganese.
The Tonics—Quinine and Strychnine, each fluid drachm contains the equivalent of 1/40th grain of pure Strychnine.
And the Vitalising Constituent—Phosphorus; the whole combined in the form of a Syrup with a Slightly Alkaline Reaction.
It Differs in its Effects from all Analogue Preparations; and it possesses the important properties of being pleasant to the taste, easily borne by the stomach, and harmless under prolonged use.
It has Gained a Wide Reputation, particularly in the treatment of Chronic Bronchitis, and other affections of the respiratory organs. It has also been employed with much success in various nervous and debilitating diseases.
Its Curative Power is largely attributable to its stimulant, tonic, and nutritive properties, by means of which the energy of the system is recruited.
Its Action is Prompt; it stimulates the appetite and the digestion, it promotes assimilation, and it enters directly into the circulation with the food products.
The prescribed dose produces a feeling of buoyancy, and removes depression and melancholy; hence the preparation is of great value in the treatment of mental and nervous affections. From the fact, also, that it exerts a tonic influence, and induces a healthy flow of the secretions, its use is indicated in a wide range of diseases.

NOTICE—CAUTION.
The success of Fellows' Syrup of Hypophosphites has tempted certain persons to offer imitations of it for sale. Mr. Fellows, who has examined samples of several of these, finds that no two of them are identical, and that all of them differ from the original in composition, in freedom from acid reaction, in susceptibility to the effects of oxygen when exposed to light or heat, in the property of retaining the strychnine in solution, and in the medicinal effects.
As these cheap and inefficient substitutes are frequently dispensed instead of the genuine preparation, physicians are earnestly requested, when prescribing the Syrup to write "Syr. Hypophos. Fellows."
At a further precaution, it is advisable that the Syrup should be ordered in the original bottles; the distinguishing marks which the bottles (and the wrappers surrounding them) bear, can then be examined, and the genuineness—or otherwise—of the contents thereby proved.

This preparation can be procured at all chemists and druggists, everywhere.
Antiphlogistine

(Inflammation's Antidote)

A hygroscopic, antiseptic cataplasm, indicated in all superficial and deep-seated inflammatory and congestive conditions, composed of the finest anhydrous and levigated argillaceous mineral, chemically pure glycerine, compounds of iodine, representing a small percentage of elementary iodine, minute quantities of boric and salicylic acids and the oils of peppermint, gaultheria and eucalyptus.

In the field of medical practice, the ethical principles guide the actions and decisions made by healthcare professionals. These principles are not only important for the patients' well-being but also for maintaining trust and respect in the field of medicine. The ethical principles are derived from various sources, including medical ethics, law, and cultural norms.

One of the most important ethical principles is the principle of autonomy. This principle emphasizes the patient's right to make informed decisions about their own health and treatment. It is crucial for healthcare providers to respect their patients' autonomy by providing accurate information and allowing them to make their own choices.

Another important ethical principle is the principle of beneficence. This principle requires healthcare providers to act in the best interests of their patients. This may involve withholding or withdrawing treatment, depending on the situation and the patient's best interest.

The principle of non-maleficence is also crucial in medical practice. This principle requires healthcare providers to avoid causing harm to their patients. This may involve avoiding unnecessary procedures or interventions that may cause harm.

In conclusion, the ethical principles are fundamental to the practice of medicine. They guide healthcare providers in making decisions that are in the best interest of their patients while also maintaining the trust and respect of their patients and the public.

The Alcohol Cult
ABSTRACTS

For our connection to the environment, our ability to learn and our skills to adapt changes dramatically as we move from early childhood to adulthood. In the abstract, we explore the concept of lifelong learning and the role it plays in shaping our understanding of the world. We discuss the importance of early childhood education and the impact it has on developing a strong foundation for lifelong learning. We also examine the role of technology in facilitating lifelong learning and the challenges of adapting to new technologies in the classroom and beyond. Finally, we address the importance of fostering a culture of lifelong learning in our society and the role that educators and policymakers can play in promoting this vision.

THE JOURNAL OF INFINITY

In this article, we explore the concept of infinity and its implications in various fields of study, including mathematics, physics, and philosophy. We discuss the historical development of the concept of infinity, from ancient Greek philosophers to modern-day mathematicians. We also examine the role of infinity in contemporary science, particularly in the study of quantum mechanics and relativity. Finally, we address the philosophical implications of infinity and its role in our understanding of the universe.
FORMULA HAS ALWAYS BEEN ON EVERY BOTTLE

PAS-AVENA
The Powerful, but Absolutely Harmless
SOPORIFIC-SEDATIVE-ANODYNE

Contains No Morphine or Opiates, Chloral, Bromides, Sulphonal or Paraldehyde. Introduced as a substitute for the many injurious narcotics and antispasmodics now in general use. Possesses a pronounced specific action as a nerve sedative and hypnotic. Insures nerve tranquility and induces a calm neural equilibrium. Invaluable in INSOMNIA, HYSTERIA, NEURASTHENIA, CONVULSIONS, EPILEPSY, TETANUS, CHOREA, SPASMATIC ASTHMA, NEURALGIA, ALCOHOLISM, MORPHINE or OPIUM HABIT, and ALL conditions resulting from IMPAIRED NERVE FUNCTION. A single trial will soon convince you of its analgesic and sedative qualities.

DOSE. Teaspoonful, repeat half-hourly if necessary. Children in proportion to age. Where immediate action is required, a dessertspoonful or tablespoonful may be administered at a single dose with safety.

LITERATURE AND SAMPLE SENT POSTPAID TO PHYSICIANS UPON REQUEST.

The American Society and other

THE OBJECT OF THE SOCIETY IS

1. To promote the scientific study of alcohol and other narcotics, particularly the etiological, physiological, therapeutical, and medico-legal relations, and also the sociological and clinical aspects of this subject.

2. To gather and formulate all the facts of the disease of inebriety and other forms of narcomanias, and point out the means of cure and prevention by legal and institutional methods and other remedial and prophylactic forms of treatment.

3. To compile and make available the studies and experiences of physicians in all parts of the country who have given attention to the diseases associated with and following from alcohol and other forms of drug taking.

4. The spirit and purpose of this society is to study alcohol and narcotics in all their relations to the human economy from a medical point of view, independent of all previous theories and conclusions.

5. All regular practitioners of medicine, and others whose credentials are satisfactory may become members by a majority vote of the Executive Committee after signing the application printed on the opposite page, and forwarding it, accompanied with the initiation fee ($5.00) and the annual dues ($2.00) to the Secretary of the Society.

The Journal of Inebriety is supplied post free to all members of the Society.
for the Study of Alcohol Narcotics

OFFICERS
Honorary President — H. O. Marcy, M. D., LL.D., Boston, Mass.
President — W. S. Hall, Ph.D., M. D., Chicago, Ill.
Vice-Presidents — L. D. Mason, M. D., Brooklyn, N. Y.; T. A. McNicholl, M. D., New York City; J. W. Grosvenor, M. D., Buffalo, N. Y.; F. DeWitt Reese, M. D., Courtland, N. Y.
Secretary — T. D. Crothers, M. D.
Corresponding Secretary — C. E. Stewart, M. D., Battle Creek, Mich.
Treasurer — Geo. E. Pettey, M. D., Memphis, Tenn.
Executive Committee — L. D. Mason, M. D., T. A. McNicholl, M. D., T. D. Crothers, M. D.

If you are interested in this great work send in your application for membership.

APPLICATION

I desire to become a member of The American Society for the Study of Alcohol and Other Narcotics, and am willing to comply with the requirements of its by-laws, and promote the object of this Society. I enclose $7.00, being my initiation fee ($5.00) and annual dues for 1907 ($2.00).

Name

Address all Communications to

T. D. CROTHERS, M. D., Secretary, 194 Boylston Street, Boston.
Riverview Sanatorium, Fishkill-on-Hudson, N.Y.
Under State License.

A select private home for nervous invalids, mild mental disorders, alcoholics and drug habitués, amid quiet, restful surroundings. A detached cottage for suitable cases. The drives are particularly attractive and varied, and facilities afforded for croquet, tennis and other diversions. Thoroughly equipped with all modern conveniences and easy of access via N.Y. Central and Hudson River R.R. Large verandas, cheerful, sunny rooms, including a sun-parlor, are features of the place. Beautifully located, overlooking the Hudson River and Fishkill Mountains. All approved methods of treatment used, including diet, baths, massage and electricity. Address physicians in charge.

Long Dist. Telephone 23 L. JAMES R. BOLTON, M.D., Fishkill-on-Hudson, N.Y.

The Sanitarium, Battle Creek, Mich.

The Battle Creek Sanitarium System of dealing with patients who have become addicted to drug habits differs essentially from the methods in common use, and especially in the following particulars:

1. No drugs are used. They are not found necessary, and delay the delivery of the patient from his bondage.

2. A patient is not considered cured until his nervous system has been built up and his constitution fortified by the removal of the conditions which have been the occasion of his resorting to drugs for relief.

3. No reliance is placed upon hypnotism, suggestion, deception, or any allied methods in treating these cases. The patient is treated as one having a deteriorated organism which requires to be restored to a healthy and normal state. This is accomplished by a combination of physiologic measures in which hydrotherapy, phototherapy and electrotherapy play a very important part in combination with a proper regulation of the diet, and such mental and moral discipline as may be needed.

Incorrigible, offensive, and insane patients are not received.
Antiphlogistine

(INFLAMMATION'S ANTIDOTE)

Apply
Hot
and
Thick

Entero-Colitis, Cholera Infantum
Peritonitis

In acute inflammatory conditions of the
intestinal tract Antiphlogistine will be
found of great value. It will not take
the place of proper diet and internal
medication, but by relieving the local
congestion and soothing the nervous
system, it will be found to be an inesti-
mable adjuvant.

CHICAGO  DENVER  SAN FRANCISCO

NEW YORK  LONDON  SYDNEY  MONTREAL
Thirty years ago THE JOURNAL OF INEBRIETY was established for the distinct purpose of teaching the medical public that Inebriety was a disease, both curable and preventable.

As result of its work, the disease of Inebriety is today recognized as one of the most serious of all the evils which threaten civilization, and the longevity of the race.

A new realm of medical practice has been opened to the physician, and this Journal is its organ and exponent.

It stands alone in the work of grouping the facts and conclusions from clinical and laboratory studies, along physiological, pathological and therapeutic lines.

The special object of this Journal is to make the physician acquainted with the causes and conditions of Inebriety, and assist him to apply scientific, curative and preventive measures.

Inebriety exists in every community of the country, and the medical man should be the authority to determine all questions of prevention and cure from a scientific rather than a theoretical point of view. Hence, this Journal appeals to every practical and progressive physician to take up the subject and become a student in this new border-land psychosis.
CALCALITH
(Calcium Carbonate Compound, with Colchicine.) — Abbott

Formula: Repurified calcium carbonate, grs. 10; lithium carbonate, gr. 1; and colchicine, gr. 1-500; in aromatic combination.

An efficient remedy for most manifestations of the Uric-Acid Diathesis—useful in Lithemia, Gout, Nephrolithiasis, Lumbago, Urinary Hyperacidity, Uric-Acid Eczema, Phosphaturia, Gravel, Rheumatism, etc.

Many so-called “uric-acid solvents” have been tried and found wanting as to practical results, because, although they dissolve uric acid in a test-tube, they do not do so in the body fluids. Elimination of residues and prevention of deposit is the essential thing and Calcalth does this more positively and more potently than any other preparation of this class.

Use Calcalth with Salithia, the Sulphocarbulates, Bilein or other hepatic stimulants and you will have no further dread of the “uric-acid diathesis.”

Calcalth also works “Magically” in Urinary Troubles.

From Dr. Toland down in Texas we have the statement that:

“There’s nothing surpasses Calcalth. I gave it a fair test two weeks ago in a patient who has cystitis, prostatitis, urethritis and gonorrheal rheumatism and was passing matter (pus and blood) with his urine. He surely was in a bad condition, but Calcalth and Salithia with other alkaloidal remedies, soon brought him around all right."

Per dozen, 200 to each package .......... $9.00
In less than 1-2 dozen lots, each package .... 3.00
Bulk, per 1000. ........................................ 3.50
Per 5000. ........................................ 1.50

NOTE: One can each of Calcalth (80c) and Salithia (55c) once only as “sample” prepaid on receipt of $1.00. Enclose this advertisement, Money back if not satisfied.

Literature and Samples mailed on request.

RAYENSWOOD STATION, CHICAGO  OAKLAND
THE new Pure Food and Drugs Act requires all manufacturers to sell their products under a guaranty, and a general guaranty should be filed in the office of the Secretary of Agriculture at Washington.

The following is a copy of a letter issued from the Department of Agriculture to us:

DEPARTMENT OF AGRICULTURE
Office of the Secretary
WASHINGTON

November 1, 1906.

The Antikamnia Chemical Company,
St. Louis, Mo.

Gentlemen:

Your guaranty as to the character of the materials manufactured and sold by you, given in accordance with Circular 21 of this office, has been received, found to be in proper form and is regularly filed. The serial number attached thereto is No. 10.

Respectfully,

W. M. HAYS, Act. Sec'y.

All Antikamnia Preparations are sold under this guaranty and our Serial No. 10 appears on every package sold under the new law, thus assuring the medical profession of the absolute reliability of these pharmaceuticals.
